

## Geography Vision Map

### Year 4 – Natural Resources of the world

<b>Crucial Knowledge</b>	<b>Intent</b>
<ul style="list-style-type: none"><li>• Natural resources are things that are <u>not</u> made by humans.</li><li>• The UK has lots of natural resources such as coal, crops and livestock.</li><li>• Fossil fuels are natural sources of energy. These include oil, coal and gas.</li><li>• Crops are plants used for food.</li><li>• Livestock are animals used for food and clothes.</li><li>• Fossil fuels are non-renewable which means once they have been used, they cannot be used again.</li><li>• Renewable energy means it can be used again, such as wind, sun and water as these never run out.</li></ul>	<ul style="list-style-type: none"><li>• Recap – Man-made resources (Year 3)</li><li>• Land use</li><li>• Farming: crops</li><li>• Farming: livestock</li><li>• The water cycle</li><li>• Non-renewables (fossil fuels)</li><li>• Renewable energy</li><li>• Use of natural products: timber, paper, rubber</li><li>• Reducing waste</li><li>• Comparing renewable and non-renewable energy</li></ul>
