

Science Vision Map

Year 2 – Plants

Crucial Knowledge

- Plants are living things.
- Seeds and bulbs need water to start growing (germinate).
- Most seeds and bulbs don't need light to start growing as they have a store of food inside them.
- Plants will need water, light and the right temperature (warmth) to grow healthily.
- Plants get their food (energy) from light (sun).

Intent

- Recap Y1: Plants.
- Observe (watch) seeds and bulbs germinating and then growing.
- Talk about how seeds and bulbs germinate and grow.
- Find out and talk about what plants need to grow and stay healthy.
