

Science Vision Map

Year 1 – Plants

Crucial Knowledge

- A plant is a living thing that usually grows in earth (soil).
- A plant grows from a seed or a bulb.
- Plants can be big or small.
- A plant needs water and sunlight to stay alive.
- Some plants (and trees) have green leaves all of the time. These are called 'evergreen'.
- Some leaves fall off plants (and trees) in the winter time. These are called 'deciduous'.
- All plants have roots which grow underground.

Intent

- Recap – Growing (Reception)
- Name and describe common wild and garden plants
- Deciduous and evergreen trees
- Parts of a plant with a flower
- Watching and describing how plants grow (making simple changes to their surroundings)
- Maddie, the plants and you (CBeebies – curiosity)
